Hitachi ACII Series Trucks are built to match the rugged, long-lived durability of Hitachi mining shovels and backhoes. That means a 60- to 100,000-hour life with good maintenance.

The truck frame is still the strongest in its class. The unique trailing-arm suspension pioneered by Euclid minimizes frame stress and fatigue while providing lower tire wear and better steering. Now, vertical integration of Hitachi engineering and parts has led to new designs and updates of previous features, for improved productivity and reliability. The Hitachi-designed and -built AC-drive system utilizes the world-proven Insulated-Gate Bipolar Transistor (IGBT) drive technology. Hitachi is the only truck available with a drive system designed and built by the same company as the truck. II Rigid Dump Truck Service Manual has easy to read sections of text with top diagrams and instructions Quality. They are specially written for the do it works, as well as the experienced mechanic. HITACHI EH 4000A II Rigid Dump Truck Service Repair Manual PDF covers every single detail on your computer and provides step-by-step instructions on the basis of the complete disassembly of the machine.
