Hitachi's Super EX200 puts advanced technology to work. Rugged enough to stand up to your toughest jobs, with "Human Touch" engineering to make getting those jobs done a lot more comfortable. They are built to survive, built to perform, and built to

give you real value for your dollar. One of the EX200's secrets for operator acceptance is that the machine is so well balanced. It is easier to get fuller buckets faster with the EX200. This allows the operator to use all the power available. This outstanding balance makes the operator productive while giving a higher level of confidence and comfort. The four work modes have been enhanced from prior models. 1- The General Purpose Mode is appropriate for general digging and truck loading. All circuits work together. ②- The Grading Mode provides priority to the combined operation of boom raise, stick forward and bucket adjustment while limiting control response so that the movement is smooth. One of the EX200's secrets for operator acceptance is that the machine is so well balanced. It is easier to get fuller buckets faster with the EX200. This allows the operator to use all the power available. This outstanding balance makes the operator productive while giving a higher level of confidence and comfort.
